

# DNT-LB Transit Monitors

**Product Description** Single-use monitors designed to reveal if consignments have been dropped at a force exceeding a pre-set limit of G-force.

A range of G-force limits enables consignment-appropriate monitoring and dual companion labels alert operatives to the presence of the monitor and the need to handle the consignment appropriately.

Monitors may be applied to consignments either with the self-adhesive backing or with screws or nails through the pre-drilled holes.
