

# GSG100

## Gas Shrink System

Complete with hose and regulator

The Transpal GSG100 gives you stronger build quality and more power, but is also ergonomically designed for safe and comfortable use. The nozzle is protected by an integral heat shield and the burner cooling is aided by the propane gas flow.

Shrink wrapping large consignments with the Transpal GSG100 Gas Shrink System

- > improves load stability
- > enhances protection against weather and dust contamination
- > enables outside storage
- > allows easy identification of securely wrapped contents
- > acts as a deterrent to pilferage

### Technical Data

Fuel	Propane gas
Fuel Container	Standard industrial propane cylinder
Ignition	Piezo crystal
Gas Pressure	3.5 bar (50 psi)
Heat Variable	32kw (110,000 BTU)
Gas Consumption	2kg/hr (5lb/hr)
Weight	approx. 1kg
Hose Lengths	8mtr
Burner Safety	Auto cut-off on trigger release
Regulator	Excess failure valve
Maintenance	Occasional drop of oil as supplied

Transpal heat shrink accessories and consumables include:

A wide range of polythene shrink film in centre fold, gusset tubing and bag on roll configurations
