Optimax AP450 Air Cushion Machine

Combining speed, flexibility and durability to keep your products protected during transit

Need a machine that keeps pace with medium- to high-volume demand?

With high-speed output, broad film compatibility and a durable, low-maintenance design, the Optimax AP450 delivers premium-level performance – without the premium price.

Built for **speed**, the AP450 helps you keep pace with demand in busy packing environments, with output speeds up to 23m/min.

Designed for **flexibility**, it handles a wide range of film materials up to 800mm wide, so you can keep using the consumables you already stock. With a large capacity to handle jumbo rolls up to 3,000m, you'll spend less time on roll changes and more time keeping your packing lines moving.

Engineered for **durability** with a silicone wheel and ceramic-coated heating roller, the AP450 is a low-maintenance solution that keeps delivering, shift after shift.

Already using an air cushion machine?

You could be saving more with Optimax. Switch to the AP450 today and discover a faster, more affordable way to keep your products protected in transit.

Why choose the Optimax AP450?

SPEED

High-speed performance

Produces air cushions up to 23m/min – boosting throughput, supporting multiple packing stations from one machine.

Large roll capacity

Accommodates jumbo rolls up to 3,000m so you can spend less time changing rolls and more time keeping production moving.

FLEXIBILITY

Flexible film compatibility

Works with a wide range of films from multiple brands up to 800mm wide* (including HDPE, PLA and paper).

11 film type settings

Easily programmable settings to suit your films – offering more than twice the settings of other similar machines on the market.

DURABILITY

Engineered for durability

Its long-lasting silicone wheel and ceramic-coated heating roller provide a low maintenance solution that minimises downtime.

Peace of mind

Backed by a 24-month parts and a 12-month labour warranty.

Plus glove friendly touchscreen, lock function for consistent settings, usage tracking and adjustable power-saving mode to increase productivity and efficiency.

**Adaptable for larger formats: Extension bracket available for 600mm and 800mm wide rolls.*

Optional accessories to further enhance efficiency:

Foot pedal

Enables hands-free operation, speeding up workflow and freeing up hands for packing

Sensor

Ensures the hopper never runs empty, reducing downtime

Roll extender

Accommodates film rolls up to 800mm wide, ideal for protecting larger items

Accessories sold separately

"Since bringing in the AP450, we've been able to keep up with busy periods more easily. It keeps all our packing stations supplied and works with a wide variety of film types, both material and size."
