# SFT

## PROFESSIONAL STRAP FEED TOOL

### Features include:

- > High speed manual feeding of strap through any pallet frame
- > Ergonomic head design rides over pallet runners and prevents jamming
- > Sturdy fibreglass guide rod
- > Suitable for PET, PP and cord strapping
- > Takes all strap widths and thicknesses

### Specifications

- > Head dimensions (L x W x H) 145 x 81 x 43mm
- > Total length 1823mm
- > Weight 0.2kg

The ergonomic nylon handle connects to the body with a long, flexible fibreglass rod that enables the user to steer the strap, even through tight spaces between pallets.

Strap threading with the SFT is fast, accurate and significantly reduces stooping and kneeling.

Insert the strap into the flexible polyurethane cleat, making sure it is securely held along the length of the cleat.

The profile of the high impact nylon body means it rides straight over pallet runners and around the centre and edge blocks.
